

# eLock

revolutionizing *electronic access control*  
for *general cabinetry and appliances*

**CompX eLock** is available in six versions

All six versions are available in keypad, proximity and magstripe card readers.

- **eLock only** - for use with solenoids and/or electric door strikes
- **cabinet eLock kit** - standalone security on any door or drawer
- **refrigerator kit** - security for any appliance
- **horizontal mount refrigerator kit** - security for any appliance with side locking capability
- **temperature monitoring refrigerator kit** - temperature monitoring and security for any appliance -40 °F to 122 °F (-40 °C to 50 °C)
- **temperature monitoring only** - programmable with alarm capability

LockView® Software can be used with all versions of eLock, providing **audit trails** for access attempts and **temperature logs**, as well as programming and managing user databases.
